Notes to the consolidated financial statements

The financial report is a translation from the original German version. In case of any inconsistency the German version shall prevail.

General information and changes in accounting policies

General information

The Swisscom Group (hereinafter referred to as “Swisscom”) provides telecommunication services, and is active primarily in Switzerland and Italy. The consolidated financial statements for the year ended 31 December 2020 comprise Swisscom Ltd, as the parent company, and its subsidiaries. Swisscom Ltd is a public limited company with special status under Swiss law and has its registered office in Ittigen (Berne). Its address is: Swisscom Ltd, Alte Tiefenaustrasse 6, 3048 Worblaufen. Swisscom is listed on the SIX Swiss Exchange. The number of issued shares is unchanged from the prior year and totals 51,801,943. The shares have a nominal value of CHF 1 and are fully paid-up. Each share entitles the holder to one vote. The majority shareholder of Swisscom Ltd remains, as in the prior year, the Swiss Confederation (“Confederation”). The Confederation is obligated by current law to hold the majority of the capital and voting rights. The Board of Directors of Swisscom approved the issuance of these consolidated financial statements on 3 February 2021. As of this date, no material events after the reporting date have occurred. The consolidated financial statements are subject to approval by the shareholders of Swisscom Ltd in its Annual General Meeting to be held on 31 March 2021.

Basis of preparation

The consolidated financial statements of Swisscom have been prepared in accordance with International Financial Reporting Standards (IFRS), and in compliance with the provisions of Swiss law. The reporting period covers twelve months. The consolidated financial statements are presented in Swiss francs (CHF), which corresponds to the functional currency of Swisscom Ltd. Unless otherwise noted, all amounts are stated in millions of Swiss francs. The consolidated financial statements are drawn up on the historical cost basis, unless a standard or interpretation prescribes another measurement basis for a particular line item, in which case this is explicitly stated in the accounting policies. Material accounting policies of relevance for an understanding of the consolidated financial statements are set out in the specific notes to the financial statements.

Significant judgements, estimates and assumptions in applying the accounting policies

The preparation of consolidated financial statements is dependent upon assumptions and estimates being made in applying the accounting policies, for which management can exercise a certain degree of judgement. In particular, this concerns the following positions:

Description	Further information
Leases	Note 2.3
Property, plant and equipment	Note 3.2
Intangible assets	Note 3.3
Goodwill	Note 3.4
Provisions for dismantlement and restoration costs	Note 3.5
Provision for regulatory and competition law procedures	Note 3.5
Defined benefit plans	Note 4.3

Impact of the Covid-19 pandemic

In March 2020, government measures against the spread of Covid-19 restricted economic activities in the key regions for Swisscom, Switzerland and Italy. With the exception of international roaming, the impact on Swisscom's telecommunications business is minimal. The international roaming business recorded a sharp decline as a result of reduced travel activity. Furthermore, Covid-19 resulted in a negative business trend in the cinema and event business. Covid-19 does not have a significant impact on the key estimation uncertainties and assumptions. It is not possible to definitively quantify the potential financial impact of Covid-19 as there is a high degree of uncertainty as regards relevant various factors (especially the extent and duration of the pandemic, government support measures to benefit the economy, customer behaviour in Switzerland and Italy, etc.).

Amendments to International Financial Reporting Standards and Interpretations which are to be applied for the first time in the financial year

Standard	Name
Amendments to IFRS 3	Definition of a business
Amendments to IFRS 16	Rent concessions in connection with Covid-19
Amendments to IAS 1 and IAS 8	Definition of material
–	Amendments to the references to the framework in the IFRS standards

As of 1 January 2020 onwards, Swisscom adopted various amendments to existing International Financial Reporting Standards (IFRS) and Interpretations, which have no material impact on the results or financial position of the Group. Further information regarding the changes to the IFRS which must be applied in 2021 or later are set out in Note 6.3.

1 Operating performance

This chapter sets out information on the operating performance of Swisscom in the current financial year. The classification according to operating segments corresponds to the reporting system used internally to evaluate performance and allocate resources as well as to Swisscom's management structure.

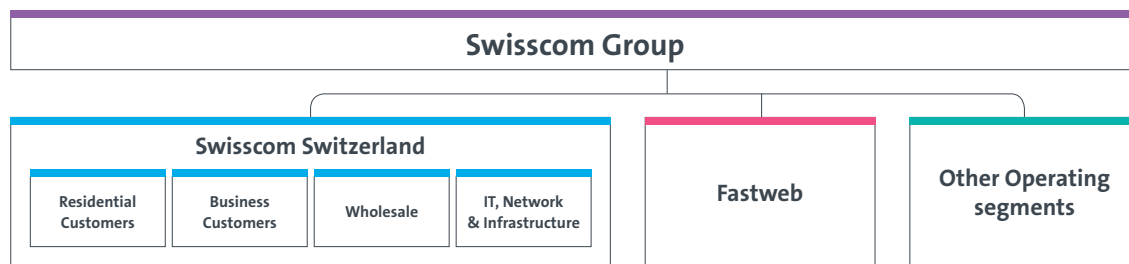

1.1 Segment information

Changes in segment reporting

As of 1 January 2020, Swisscom amended its organisational structure in Switzerland and the segment formerly known as Enterprise Customers was renamed Business Customers. In order to provide all business customers with a customer experience tailored to their needs, Swisscom has merged the SME and Corporate Customer segments. As a result, segment reporting now includes the telecommunications and solutions business with small and medium-sized enterprises in the Business Customers segment (previously reported under Residential Customers). In addition, Swisscom has bundled Customer Field Services in Switzerland, some of which were previously reported in the Residential Customers segment, at its subsidiary cablex Ltd (Other Operating Segments). Finally, Swisscom has transferred various areas between Swisscom Switzerland and Group Headquarters as of 1 January 2020. The prior-year amounts have been restated as follows:

In CHF million	Reported	Adjustment	Restated
Net revenue			
2019 financial year			
Residential Customers	5,691	(955)	4,736
Business Customers (previously Enterprise Customers)	2,312	928	3,240
Wholesale	968	–	968
IT, Network & Infrastructure	85	–	85
Elimination	(493)	37	(456)
Swisscom Switzerland	8,563	10	8,573
Fastweb	2,468	–	2,468
Other Operating Segments	929	150	1,079
Group Headquarters	1	–	1
Elimination	(508)	(160)	(668)
Total net revenue	11,453	–	11,453
Segment result			
2019 financial year			
Residential Customers	3,264	(631)	2,633
Business Customers (previously Enterprise Customers)	603	673	1,276
Wholesale	525	(14)	511
IT, Network & Infrastructure	(2,642)	(33)	(2,675)
Swisscom Switzerland	1,750	(5)	1,745
Fastweb	155	–	155
Other Operating Segments	114	(1)	113
Group Headquarters	(74)	6	(68)
Elimination	(77)	–	(77)
Total segment result	1,868	–	1,868

General information

Segment	Activity
Residential Customers	The Residential Customers segment provides mobile and fixed-network services in Switzerland, such as telephony, broadband, TV and mobile offerings. The segment also includes the sale of terminal equipment.
Business Customers	The Business Customers segment focuses on telecom services and overall communications solutions for large corporations and customers from small and medium-sized enterprises in Switzerland. Its offering in the area of business ICT infrastructure covers the entire range from individual products to complete solutions.
Wholesale	This segment incorporates the use of the Swisscom fixed-line and mobile network by other telecommunications service providers and the use of external networks by Swisscom. In addition, Wholesale includes roaming by foreign operators whose customers use the Swisscom mobile network, as well as broadband services and regulated access services to the access network.
IT, Network & Infrastructure	The segment IT, Network & Infrastructure is responsible for the planning, operation and maintenance of Swisscom's network infrastructure and all IT systems. It is responsible for the development and production of IT and network services in Switzerland. In addition, IT, Network & Infrastructure also includes the support functions Finances, Human Resources and Strategy for Swisscom Switzerland as well as the management of real estate and the vehicle fleet in Switzerland.
Fastweb	Fastweb provides broadband and mobile services to residential, business and wholesale customers in Italy. The offering includes telephony, broadband and mobile offerings. For business customers, Fastweb offers comprehensive ICT solutions.
Other Operating Segments	Other Operating Segments mainly comprises Digital Business and Participations. Digital Business mainly comprises Swisscom Directories Ltd (localsearch), which operates in the field of online directories and telephone directories. Participations mainly comprises the subsidiaries cablex Ltd and Swisscom Broadcast Ltd. The operations of cablex Ltd are in the building and maintenance of wired and wireless networks in Switzerland, primarily in the field of telecommunications. Swisscom Broadcast Ltd is the leading provider in Switzerland of broadcast services, of cross-platform retail media services, and of security communications.

Reporting is divided into the segments Residential Customers, Business Customers, Wholesale, and IT, Network & Infrastructure, which are grouped under Swisscom Switzerland, as well as Fastweb and Other Operating Segments. Group Headquarters, which includes non-allocated costs, is reported separately.

Group Headquarters does not charge any management fees to other segments for its financial management services, nor does the IT, Network & Infrastructure segment charge any network costs to other segments. Any other services between the segments are charged at market prices. The results of the Residential Customers, Business Customers and Wholesale segments thus correspond to a contribution margin before network costs.

Segment expense encompasses the direct and indirect costs, which include personnel expense and other operating costs less capitalised costs of self-constructed assets and other income. Pension cost includes ordinary employer contributions. The difference between the ordinary employer contributions and the pension cost as provided for under IAS 19 is reported in the column "Eliminations". In 2020, the Eliminations segment result of CHF –99 million (prior year: CHF –77 million) includes an expense of CHF 65 million (prior year: CHF 47 million) as a pension cost reconciliation item in accordance with IAS 19.

Leases between the segments are not recognised in the balance sheet in accordance with IFRS 16. The reported lease expense of the segments comprises depreciation and interest on right-of-use assets excl. depreciation of pre-paid indefeasible rights of use (IRU) of CHF 24 million (prior year: CHF 30 million), impairments on right-of-use assets of CHF 7 million (prior year: none) and the accounting for the rental of buildings between segments. The lease expense of assets of low value is presented as direct costs.

Capital expenditure consists of the purchase of property, plant and equipment and intangible assets and payments for indefeasible rights of use (IRU). In general, IRU are paid in full at the beginning of the usage period. If

the criteria of IFRS 16 are met, they are classified as a lease. From an economic point of view, pre-paid IRU will be considered as capital expenditure in the segment information. IRU payments in 2020 amounted to CHF 41 million (prior year: CHF 48 million).

Swisscom Switzerland sometimes sells mobile handsets at a subsidised rate as part of a bundled offering with a mobile contract. As a result of the reallocation of revenue over the pre-delivered components (mobile handset), revenue is recognised earlier than the date of invoicing. This results in contract assets deriving from this business being recognised. In the segment reporting of Swisscom Switzerland, the recognition and dissolution of these contract assets is reported as other revenue. The amounts invoiced are reported under revenue from telecommunications services or merchandise.

Accounting policies

Telecommunication services

Telecommunication services encompass mobile and fixed-network services both in Switzerland and abroad. Mobile phone services comprise the basic charges; in addition, they include the domestic and international cellular traffic due to Swisscom customers within Switzerland and abroad. Swisscom offers subscriptions with a monthly flat-rate fee, the revenue for which is recognised on a straight-line basis over the minimum term of the contract. Depending on the type of subscription, revenue is recognised on the basis of the minutes used. The minimum contract term is generally 12 or 24 months. If a mobile handset is sold as part of a bundled offering with a mobile contract, it is considered as a multi-component contract. Multi-component transactions are grouped into portfolios for revenue accounting. The transaction price for multi-component contracts is allocated to each identified benefit obligation on the basis of relative stand-alone selling prices. In this process, the stand-alone selling price of each component is considered in relation to the sum of the stand-alone selling prices of all benefit obligations under the contract. The stand-alone selling prices of mobile handsets and subscriptions correspond to Swisscom's list price and the minimum contract term. Non-refundable connection fees which do not constitute a separate benefit obligation are considered as part of the total transaction price and allocated to the separate benefit obligations arising under the customer contract on a pro rata basis. In the event that there is no minimum contract term, the revenue is recognised at the time of connection.

Fixed-network services principally comprise the basic charges for fixed telephony, broadband and TV connections, as well as the domestic and international telephony traffic of individuals and corporate customers. In addition, Swisscom makes bundled offerings comprising broadband and TV connections with an optional fixed-line telephony connection. These subscription fees are flat rate. The minimum contract term is twelve months. Revenues are recognised on a straight-line basis over the term of the contract. Revenue for telephone calls is recognised at the time when the calls are made.

Solutions

The service area of communications and IT solutions principally comprise advisory services and the implementation, maintenance and operation of communication infrastructures. Furthermore, the area includes applications and services, as well as the integration, operation and maintenance of data networks and outsourcing services. Revenue from customer-specific orders is recognised using a measure of progress method, which is measured on the basis of the relationship of the costs incurred to total anticipated costs. Revenue arising on long-term outsourcing contracts is recognised as a function of performance to date provided to the customer. The duration of these contracts is generally between three and seven years. Transition projects in connection with an outsourcing contract are not recorded as separate benefit obligations. Maintenance revenues are recognised on a straight-line basis over the term of the maintenance contracts.

Sales of merchandise

Mobile handsets, fixed-line devices and miscellaneous supplies are recognised as revenue at the time of delivery or provision of the service. Swisscom sells routers and TV boxes to be used for services provided by Swisscom. As these are only compatible with the Swisscom network and cannot be used for networks of other telecommunication service providers, they are not recorded as separate benefit obligations. Revenue is deferred and recognised over the minimum contract term of the related broadband or TV subscription.

Wholesale

The services principally comprise leased lines and the use of the Swisscom fixed network by other telecommunication service providers (roaming). Leased-line charges are recognised as revenue on a straight-line basis over the terms of the contract. Roaming services are recognised as revenue on the basis of the call minutes or at contractually agreed charges as of the time of providing the service. Roaming fees charged to other telecommunication service providers are reported on a gross basis.

1.2 Operating expenses

Direct costs

In CHF million	2020	2019
Customer premises equipment and merchandise	980	1,095
Services purchased	646	642
Costs to obtain a contract	285	327

Own work for capitalized contract costs	(40)	(66)
Gain on sale of property, plant and equipment	(11)	(13)
Miscellaneous income	(56)	(86)
Total capitalised self-constructed assets and other income	(466)	(509)
Total indirect costs	4,049	4,280

¹ See Note 4.1.

Capitalised self-constructed tangible and intangible assets include personnel costs for the manufacturing of technical installations, the construction of network infrastructure and the development of software for internal use.

Accounting policies

Costs to obtain a contract

Swisscom pays commissions to dealers for the acquisition and retention of mobile-phone customers. The commission payable is dependent on the type of subscription. Costs to obtain a contract are deferred and amortised over the related revenue-recognition period. In addition, Swisscom will reimburse the dealer for any handset subsidies they grant to customers when they take out a Swisscom mobile subscription at the same time. The associated costs are deferred and amortised on a straight-line basis over the contract term as the costs of obtaining a contract. The amortisation period corresponds to the related revenue-recognition period. See Note 1.1.

Costs to fulfil a contract

In connection with a broadband or TV subscription, the customer must purchase a router or TV box in order to use the services of Swisscom. Routers and TV boxes may be used exclusively for services provided by Swisscom. The cost of routers and TV boxes are reported as costs to fulfil a contract and amortised over the minimum term of the contract. The set-up costs incurred to transfer and integrate outsourcing transactions with corporate customers are deferred and amortised against income on a straight-line basis over the duration of the operating contract. The amortisation period corresponds to the related revenue-recognition period. See Note 1.1.

2 Capital and financial risk management

The following chapter sets out the procedures and guidelines governing the active management of the capital structure and the financial risks to which Swisscom is exposed. Swisscom strives to achieve a robust equity basis, which enables it to guarantee its ability to continue as a going concern and to offer investors an appropriate return based on the risks assumed.

2.1 Capital management and equity

Ratio of net debt to EBITDA after lease expense

Swisscom has a single A credit rating with rating agencies Standard & Poor's and Moody's. Swisscom aims to maintain this single A credit rating. An important quantitative criterion for the credit rating and the assessment and control of the financial situation by the management is the ratio of net debt to operating result before depreciation, amortisation and impairment losses after lease expense (EBITDA AL). Net debt comprises financial liabilities less cash and cash equivalents, listed debt instruments, certificates of deposit, derivative financial instruments held for hedging financial liabilities and other current financial assets. Lease expense includes depreciation and interest on right-of-use assets excluding depreciation on prepaid indefeasible rights of use (IRU) and impairment losses. The net debt to EBITDA AL ratio is as follows:

In CHF million	31.12.2020	31.12.2019
Net debt	6,218	6,758
EBITDA after lease expense (EBITDA AL)	4,082	4,064
Ratio net debt/EBITDA AL	1.5	1.7

Equity ratio

Swisscom strives to achieve an equity ratio of a minimum of 30%. The equity ratio is computed as follows:

In CHF million	31.12.2020	31.12.2019
Equity	9,491	8,875
Total assets	24,262	24,247
Equity ratio in %	39.1	36.6

Dividend policy

Swisscom pursues a dividend policy with a stable dividend, taking into account its financial situation and cash flow generation. Distributable reserves are not determined on the basis of the equity as reported in the consolidated financial statements but rather on the basis of equity as reported in the statutory financial statements of the parent company, Swisscom Ltd. As at 31 December 2020, Swisscom Ltd's distributable reserves amounted to CHF 5,644 million. The dividend is proposed by the Board of Directors and must be approved by the Annual General Meeting of Shareholders. Treasury shares are not entitled to a dividend. Swisscom Ltd paid the following dividends in 2019 and 2020:

In CHF million, except where indicated	2020	2019
Number of registered shares eligible for dividend (in millions of shares)	51.802	51.802
Ordinary dividend per share (in CHF)	22.00	22.00
Dividends paid	1,140	1,140

The Board of Directors will propose the payment of an unchanged dividend of CHF 22 per share for the 2020 financial year to the Annual General Meeting of Shareholders of Swisscom Ltd on 31 March 2021. This equates to an aggregate dividend distribution of CHF 1,140 million. The expected dividend payment date is 8 April 2021.

Earnings per share

In CHF million, except where indicated

	2020	2019
Share of net income attributable to equity holders of Swisscom Ltd	1,530	1,672
Weighted average number of shares outstanding (number)	51,800,587	51,801,540
Basic and diluted earnings per share (in CHF)	29.54	32.28

On 31 December 2020, Swisscom took on short-term bank loans on a weekly and monthly basis for CHF 199 million (prior year: EUR 460 million; CHF 499 million). Bank loans to the value of EUR 150 million (CHF 162 million) may become due for immediate repayment if the shareholding of the Confederation in the capital of Swisscom falls below one third, or if another shareholder can exercise control over Swisscom.

4 After hedging with currency swap and taking hedge accounting into consideration.

In the second quarter of 2020, Swisscom became the first listed company in Switzerland to issue a Green Bond in EUR. The amount borrowed totalled EUR 500 million (CHF 519 million). The coupon was 0.375% and the bond has a maturity of 8.5 years. The funds raised will be used within Swisscom's Green Bond Framework. In the third quarter of 2020, Swisscom issued a CHF 100 million bond with a maturity of 11 years and a coupon of 0.125%. In the fourth quarter of 2020, Swisscom issued a CHF 100 million bond with a maturity of 14 years and a coupon of 0.245%. The funds received were used to repay existing debt. Swisscom repaid a EUR 500 million (CHF 540 million) bond upon maturity in the third quarter of 2020.

In the first quarter of 2019, Swisscom issued a debenture bond for CHF 200 million. It has a coupon of 0.5% and matures in 2029. In the second quarter of 2019, Swisscom topped up a debenture bond taken out in 2017 by CHF 80 million. It has a coupon of 0.75% and matures in 2033. In addition, Swisscom issued a debenture bond for CHF 125 million in August 2019. It has a coupon of 0% and matures in 2044. The funds received were used to repay existing debt.

Private placements

In the fourth quarter of 2019, Swisscom repaid a private placement of CHF 278 million upon maturity. The outstanding private placements of CHF 150 million may become due for immediate repayment if the shareholding of the Confederation in the capital of Swisscom falls below 35% or if another shareholder can exercise control over Swisscom.

Other financial liabilities

As at 31 December 2020, the carrying amount of other financial liabilities was CHF 207 million (prior year: CHF 230 million), consisting primarily of loans. Repayments of other financial liabilities in 2019 includes the purchase price of CHF 240 million paid to Tamedia for the acquisition of the outstanding share of 31% in Swisscom Directories Ltd. See Note 5.2.

2.3 Leases

Lessee

Swisscom's leases comprise the rental of operation and office buildings, antenna sites, and network infrastructure in particular. In addition, indefeasible rights of use (IRU) are classified as leases under IFRS 16. In general, IRU are paid in full at the beginning of use. The Italian subsidiary Fastweb procures various access services from other fixed-network operators and uses their connection cables to the end customer. Swisscom applies the low value exemption for these leases. Accordingly, no right-of-use assets and lease liabilities will be recognised for these access services, the costs of which will be reported as direct costs. There are no material lease commitments arising from leases that began after the balance sheet date.

Swisscom concluded two agreements in 2001 for the sale of real estate. At the same time, it entered into long-term agreements to lease back part of the real estate sold which, in part, qualify as finance leases. The gain realised on real estate classified as finance leases was deferred. As of 31 December 2020, the carrying amount of the deferred gains was CHF 106 million (prior year: CHF 122 million). The deferred gains are released to other income over the term of the individual leases.

Lessor

Swisscom supplies other providers of telecommunications services with access lines for use, which classify either as finance or operating lease. At the same time, Swisscom leases space in operations and offices buildings and at antenna sites, which is classified as an operating lease. Future lease payments in respect of receivables from finance leases as at 31 December 2019 and 2020 break down as follows:

In CHF million	31.12.2020	31.12.2019
Within 1 year	34	8
Between 1 and 2 years	22	54
Between 2 and 3 years	6	7
Between 3 and 4 years	4	3
Between 4 and 5 years	3	2
After 5 years	19	12
Total future payments from finance leases	88	86
Future interest income	(1)	(1)
Total receivables from finance leases	87	85

Future lease payments in respect of operating leases are as follows as at 31 December 2019 and 2020:

In CHF million	31.12.2020	31.12.2019
Within 1 year	62	57
Between 1 and 2 years	41	38
Between 2 and 3 years	39	34
Between 3 and 4 years	38	33
Between 4 and 5 years	15	33
After 5 years	16	14
Total future payments from operating leases	211	209

Significant judgements or estimates

When determining the terms of leases, management considers all facts and circumstances that encompass an economic incentive to exercise renewal options or not exercise termination options. Renewal and termination options are only included in the contract term where there is sufficient certainty that they will be exercised. This assessment is reviewed in the event of a material occurrence or change in circumstances that may affect the previous assessment, where this is within the lessee's control.

Accounting policies

Financial liabilities

Financial liabilities are initially recognised at fair value less direct transaction costs. In subsequent accounting periods, they are re-measured at amortised cost using the effective interest method.

Leases

A lease is a contract or part of a contract that transfers the right to control the use of an identifiable asset for an agreed period of time in return for payment. In particular, Swisscom leases comprise the rental of operation and office buildings, antenna sites as well as network infrastructure and indefeasible rights of use (IRU). As a lessee, for each lease Swisscom recognises a lease liability for future lease payments and a right of use for the underlying asset as at the time when the leased asset becomes available to Swisscom. The lease payments are divided into a repayment component and an interest component. The interest component is recognised as an interest expense over the lease term computed on the basis of the effective interest method. The right-of-use asset is depreciated on a straight-line basis over the shorter of the useful life and the lease term. As a lessor, Swisscom has to distinguish between finance and operating leases. A lease is recorded as a finance lease whenever essentially all of the risks and rewards incidental to ownership of the asset are transferred. Unless implicitly specified in the lease, the interest rate used to measure the rights of use and lease liabilities is the incremental borrowing rate. In the area of network access services, for selected leases Swisscom applies the exemptions regarding the separation of lease and non-lease components. The non-lease components are accounted for in accordance with other standards. Swisscom procures various access services from other network operators and uses their connection cables to the end customer. Under IFRS 16, part of these access services is classified as a lease. The value of the individual connection cable fulfils the criteria as an asset of low value. Swisscom applies the low value asset exemption for these leases. Accordingly, no right-of-use assets and lease liabilities will be recognised for these access services, the costs of which will continue to be reported as operating expense. The exemption for short-term leases is not applied. A number of leases for the rental of operation and office buildings include renewal and termination options which are taken into account in the initial measurement by category of building. Rental contracts of antenna sites have an initial lease term of 10 to 15 years. In general, these rental contracts include renewal and mutual termination options. For these leases, it's not reasonably certain that all renewal options will be exercised. Accordingly, no renewal options are taken into account in the initial measurement of lease contracts of antenna sites. Given Swisscom's planning horizon is a maximum of five years and technological developments, it is not possible to estimate the amount of additional undiscounted payments which are currently not included in the lease liabilities.

1 See Note 2.5.

3 See Note 3.5.

2 See Note 4.3.

In the third quarter of 2020, Swisscom exchanged certificates of deposit for U.S. treasury bond strips (listed debt instruments). The exchange of financial assets resulted in a valuation difference of CHF 31 million, which was recognised as financial income.

2.5 Financial risk management

Swisscom is exposed to various financial risks arising from its operating and financing activities. Financial risk management is conducted in accordance with established guidelines, with the objective of containing the potential adverse effects thereof on the financial situation of Swisscom. The identified risks and measures to minimise them are presented below:

Risk	Source	Risk mitigation
Currency risks	Swisscom is exposed to foreign exchange changes which can impact the Group's cash flows, financial result and equity.	<ul style="list-style-type: none"> Reduction in cash flow volatility by use of forward currency contracts/swaps and currency swaps and designation for hedge accounting (transaction risk) Reduction in translation risk by foreign currency financing and designation for hedge accounting Hedging of currency risk of foreign currency financing by use of currency swaps
Interest rate risk	Interest rate risks result from changes in interest rates which can negatively impact cash flows and the financial situation of Swisscom.	<ul style="list-style-type: none"> Use of interest rate swaps to manage fixed/variable share of financial debt
Credit risks from operating business activities and financial transactions	Through its operating business activities and derivative financial instruments and financial investments, Swisscom is exposed to the risk of default of a counterparty.	<ul style="list-style-type: none"> Guideline establishing minimum requirements for counterparties Designated counterparty limits Employment of netting agreements foreseen under ISDA (International Swaps and Derivatives Association) Use of collateral agreements
Liquidity risk	Prudent liquidity management involves the holding of adequate reserves of cash and cash equivalents, negotiable securities as well as the possibility of obtaining confirmed lines of credit.	<ul style="list-style-type: none"> Procedures and principles to ensure adequate liquidity Two guaranteed bank credit lines each of CHF 1,000 million

Foreign exchange risks

As regards financial instruments, the following currency risks and hedging contracts existed for foreign currencies as of 31 December 2019 and 2020:

In CHF million	31.12.2020		31.12.2019	
	EUR	USD	EUR	USD
Cash and cash equivalents	30	19	48	6
Trade receivables	(15)	9	8	9
Other financial assets	30	315	49	309
Financial liabilities	(2,350)	(221)	(3,151)	(234)
Trade payables	(37)	(49)	(34)	(35)
Net exposure at carrying amounts	(2,342)	73	(3,080)	55
Net exposure to forecasted cash flows in the next 12 months	2	(307)	41	(358)
Net exposure before hedges	(2,340)	(234)	(3,039)	(303)
Forward currency contracts	–	307	–	358
Foreign currency swaps	86	(34)	527	(44)
Currency swaps	540	–	760	–
Hedges	626	273	1,287	314
Net exposure	(1,714)	39	(1,752)	11

In addition, as of 31 December 2020, Swisscom had outstanding financial liabilities with a nominal value totaling EUR 1,650 million (CHF 1,782 million, prior year EUR 1,710 million, CHF 1,855 million), which is designated for hedge accounting of net investments in foreign operations. In 2020, income of CHF 9 million (prior year: income of CHF 72 million) arising from the measurement of financial liabilities was recognised in other comprehensive income in the position of foreign currency translation of foreign Group companies. As of 31 December 2020, the cumulative positive amount of foreign currency translation differences in equity totals CHF 243 million.

Foreign currency sensitivity analysis

The following sensitivity analysis shows the impact on the income statement should the EUR/CHF and USD/CHF exchange rates change in line with their implicit volatility over the next twelve months. The analysis assumes that all other variables, in particular the interest rate level, remain constant.

In CHF million	Income impact on balance sheet items	Hedges for balance sheet items	Planned cash flows	Hedges for planned cash flows
31.12.2020				
EUR volatility 5.14%	120	(32)	–	–
USD volatility 6.39%	(5)	2	20	(22)
31.12.2019				
EUR volatility 4.67%	144	(60)	(2)	–
USD volatility 6.01%	(3)	3	22	(22)

The volatility of balance sheet positions and scheduled cash flows is partially offset by the volatility of the related hedging contracts.

Interest rate risks

The structure of interest-bearing financial instruments at nominal values is as follows:

In CHF million	31.12.2020	31.12.2019
Fixed interest-bearing financial liabilities	6,565	6,589
Variable interest-bearing financial liabilities	274	646
Total interest-bearing financial liabilities	6,839	7,235
Fixed interest-bearing financial assets	(271)	(250)
Variable interest-bearing financial assets	(561)	(414)
Total interest-bearing financial assets	(832)	(664)
Total interest-bearing financial assets and liabilities, net	6,007	6,571
Variable interest-bearing	(287)	232
Variable through interest rate swaps	1,115	1,335
Variable interest-bearing, net	828	1,567
Fixed interest-bearing	6,294	6,339
Variable through interest rate swaps	(1,115)	(1,335)
Fixed interest-bearing, net	5,179	5,004
Total interest-bearing financial assets and liabilities, net	6,007	6,571

Interest rate sensitivity analysis

A shift in interest rates by 100 basis points has an impact of CHF 8 million on the income statement (previous year: CHF 16 million), but no impact on equity as of 31 December 2019 and 2020.

Credit risks

Credit risks from financial transactions

The carrying amounts of cash and cash equivalents and other financial assets exposed to credit risk (excluding trade receivables and contract assets) may be analysed as follows:

In CHF million	31.12.2020	31.12.2019
Cash and cash equivalents	340	328
Financial assets at amortised cost	478	390
Derivative financial instruments	79	84
Other assets valued at fair value	1	1
Total carrying amount of financial assets	898	803

The carrying amounts analysed by the Standard & Poor's rating of the counterparties may be summarised as follows:

In CHF million	31.12.2020	31.12.2019
AAA	87	31
AA- to AA+	441	421
A- to A+	218	168
BBB- to BBB+	40	63
Without rating	112	120
Total	898	803

Financial risks from operating activities

Credit risks on trade receivables, contract assets and other receivables arise from the Group's operating activities. Credit risks from other receivables are insignificant. As an initial step, Swisscom divides the credit risks from operating activities between Swisscom Switzerland and Fastweb. Default risks are principally impacted by the individual attributes of the customers. They are also influenced by the default risk of customer groups and industry sectors. Swisscom has a receivables management system in place to minimise default losses. New customers are reviewed for their creditworthiness and maximum payment targets are set for customer groups. As regards their creditworthiness, customers are divided into groups for the purposes of monitoring default risk. In the process a differentiation is made between individual and business customers, among other things. In addition, the ageing structure of the receivables is taken into account, as is the industry segment in which a business customer is active. The split of trade receivables and contract assets by operating segment is as follows:

In CHF million	31.12.2020	31.12.2019
Notional amount		
Residential Customers	1,003	1,069
Business Customers	421	436
Wholesale	141	173

Swisscom has entered into interest rate and foreign currency swaps, designated as fair value hedges, in order to hedge interest rate and foreign currency risks of fixed interest-bearing finance denominated in CHF and EUR. Derivative financial instruments contains forward contracts, designated as cash flow hedges, for hedging future purchases of goods and services in USD. Furthermore, derivative financial instruments include interest rate swaps which are not designated for hedge accounting purposes. In addition, derivative financial instruments exclusively comprise forward foreign currency transactions and foreign currency swaps in EUR and USD which serve to hedge future transactions in connection with financing or the operating business activities of Swisscom, and which were not designated for hedge accounting purposes. Swisscom does not enter into derivative financial instruments for speculative purposes.

The fair value hedge transactions of CHF 575 million and EUR 500 million designated by Swisscom will be affected by the Interest Rate Benchmark Reform (known as the IBOR Reform). In Switzerland, the changeover from the reference interest rate LIBOR to SARON is taking place. In the EUR zone, the EURIBOR was recently reformed and ESTR is to be replaced by the EONIA. Swisscom is closely monitoring developments related to the conversion of reference interest rates. It will contact the counterparties in due course to implement the switch in individual contracts.

Financial assets amounting to CHF 277 million (prior year: CHF 281 million) are not freely available, as they serve as security for liabilities.

Accounting policies

Derivative financial instruments

Derivative financial instruments are initially recognised at fair value and are subsequently measured at fair value. The method of recording the fluctuations in fair value depends on the underlying transaction and the objective pursued by purchasing or entering into this underlying transaction. On the date a derivative contract is concluded, management designates the purpose of the hedging relationship: hedge of the fair value of an asset or liability (“fair value hedge”) or a hedge of future cash flows in the case of future transactions (“cash flow hedge”). Changes in the fair value of derivative financial instruments that were designated as hedging instruments for “fair value hedges” are recognised in the income statement. Changes in the fair value of derivative financial instruments that were designated as “cash flow hedges” are dealt with in other comprehensive income, and are recognised in the hedging reserve as part of equity. If a hedge of an anticipated transaction subsequently results in the recording of a financial asset or financial liability, the amount included in equity is recognised in the income statement in the same period in which the financial asset or financial liability impacts the results. Otherwise, the amounts recorded in equity are recognised in the income statement as income or expense in the same period as the cash flows of the intended or agreed future transaction occur. Changes in the fair value of derivative financial instruments that are not designated as hedging instruments are immediately recorded as income.

Estimation of fair values

Fair values are allocated to one of the following three hierarchical levels:

- **Level 1:** exchange-quoted prices in active markets for identical assets or liabilities;
- **Level 2:** other factors which are observable on markets for assets and liabilities, either directly or indirectly;
- **Level 3:** factors that are not based on observable market data.

The fair value of publicly traded equity and debt instruments of Level 1 is based upon their stock exchange quotations as of the balance sheet date. The fair value of Level 2 financial assets and liabilities which are not quoted on exchanges are computed on the basis of future maturing payments discounted at market interest rates. Level 3 assets consist of investments in various investment funds and individual companies. The fair value is determined on the basis of a computational model. Interest rate and currency swaps are discounted at market rates. Foreign currency forward transactions and foreign currency swaps are valued by reference to forward foreign exchange rates as of the balance sheet date.

Valuation categories and fair value of financial instruments

The fair values of financial assets and financial liabilities are summarised in the following table. Not included therein are cash and cash equivalents, trade receivables and trade payables, as well as miscellaneous receivables and liabilities whose carrying amount corresponds to a reasonable estimation of their fair value.

3 Operating assets and liabilities

The following chapter discloses information on the movement in net operating assets and liabilities as well as in significant non-current tangible and intangible assets. In addition, it outlines the allocation of goodwill to the individual cash-generating units and the results of any applicable impairment tests. Changes in provisions and contingent liabilities are also presented in this chapter.

3.1 Operating net working capital

Contract assets and liabilities

In CHF million	31.12.2020	31.12.2019
Contract assets		
Swisscom Switzerland	89	162
Other	64	60
Total contract assets	153	222
Contract liabilities		
Swisscom Switzerland	535	468
Fastweb	122	133
Other	80	89
Total contract liabilities	737	690

Contract assets of Swisscom Switzerland primarily include deferrals arising in connection with the sale of bundled offerings in the mobile-phone area. In part, mobile handsets are sold on a subsidised basis, together with a mobile contract in a bundled offering. As a result of the allocation of revenue over the pre-delivered components (mobile handset), revenues are recognised earlier than the invoicing thereof. This results in contract assets deriving from this business being recognised. Contractual liabilities above all cover deferrals from payments for prepaid cards and prepaid Swisscom Switzerland subscription fees. In 2020, an amount of CHF 228 million was recorded as revenue which had been recognised as a contract liability as of 31 December 2019. Swisscom avails itself of the rules of IFRS 15.121 regarding the disclosure of the transaction price allocated to the performance obligation that are unsatisfied. The exemption is not applied in the case of mobile-phone contracts with the sale of a subsidised mobile handset and a minimum contract term. These contracts incorporate revenue of CHF 513 million (2021: CHF 370 million; 2022: CHF 143 million).

Contract costs

Contract costs include deferred costs to obtain a contract as well as costs to fulfil a contract, which may be analysed as follows:

In CHF million	31.12.2020	31.12.2019
Costs to obtain a contract		
Swisscom Switzerland	42	66

Total costs to fulfil a contract	116	125
Total contract costs	224	262

Accounting policies

Operating assets and liabilities

Total operating assets and liabilities used in the normal course of business are disclosed as current items in the balance sheet.

Trade receivables

Trade and other receivables are measured at amortised cost less impairment losses. Impairment losses on trade receivables are recognised, depending on the nature of the underlying transaction, in the form of individual valuation allowances or portfolio-based general valuation allowances which cover the anticipated default risk. As regards portfolio-based general valuation allowances, financial assets are grouped together based on homogeneous credit risk attributes, reviewed collectively for impairment and, whenever required, impairment losses are recognised. In addition to the contractually foreseen payment conditions, historical default rates and current information and expectations are taken into consideration in determining the expected future cash flows from the portfolio. Impairment losses for trade receivables are recognised as other operating expenses.

Commitments for future capital expenditures

Firm contractual commitments for future capital investments in property, plant and equipment as of 31 December 2020 aggregated CHF 800 million (prior year: CHF 809 million).

Non-cash investing and financing transactions

As a result of changes in the assumptions made in estimating the provisions for dismantlement and restoration costs, an increase therein of CHF 64 million (prior year: CHF 47 million) was recognised in property, plant and equipment with no impact on the income statement. See Note 3.5.

Significant judgements or estimates

Management estimates the useful economic lives and residual values of technical facilities, real estate and other installations and equipment, on the basis of the anticipated period over which economic benefits will accrue to the company from the use of the assets. Useful economic lives are reviewed annually on the basis of historical and forecast expectations concerning future technological developments, economic and legal changes, as well as further external factors.

Accounting policies

Property, plant and equipment is recognised at historical cost less depreciation and impairment losses. In addition to historical cost and the costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management, purchase or manufacturing cost also includes the estimated costs for dismantling and restoring the site. Borrowing costs are capitalised insofar as they are directly attributable to the acquisition or production of a qualifying asset. Costs of replacement, renewal or renovation of property, plant and equipment are capitalised as replacement investments if a future inflow of economic benefits is probable and costs can be measured reliably. The carrying amount of the parts replaced is de-recognised. Depreciation is calculated using the straight-line method except for land, which is not depreciated. The estimated useful lives for the main categories of property, plant and equipment are:

Category	Years
Ducts ¹	40
Cables ¹	15 to 30
Transmission and switching equipment ¹	4 to 15
Other technical installations ¹	3 to 15
Buildings and leasehold improvements	10 to 40
Other installations	3 to 15

¹ Technical installations.

Whenever significant parts of an item of property, plant and equipment comprise individual components with differing useful lives, each component is depreciated separately. The process for estimating useful lives takes into account the expected use by the company, the expected wear and tear, technological developments, as well as empirical values with comparable assets. Leasehold improvements and installations in leased premises are depreciated on a straight-line basis over the shorter of their estimated useful lives and the remaining minimum lease term. The impact from adjusting useful economic lives and residual values is recognised on a prospective basis. Whenever indications exist that the value of an asset may be impaired, the recoverable amount of the asset is determined. If the recoverable amount of the asset, which is the greater of the fair value less costs to sell and the value in use, is less than its carrying amount, the carrying amount is written down to the recoverable amount. The carrying amount of an item of property, plant and equipment is de-recognised upon disposal or whenever no future economic benefits are expected from its use. Gains and losses arising on the disposal of property, plant and equipment are recognised as other income or other operating expenses.

3.3 Intangible assets

Net carrying amount at 31 December 2019	447	449	703	80	163	1,842
Net carrying amount at 1 January 2019	478	512	535	103	144	1,772

As of 31 December 2020, other intangible assets include advance payments made and uncompleted development projects of CHF 150 million (prior year: CHF 149 million).

At the request of the Federal Communications Commission (ComCom), the Federal Office of Communications (OFCOM) put all of the frequencies available for mobile communications up for auction in 2019. The auction took place from 29 January to 7 February 2019. Swisscom secured 45% of the frequencies auctioned by all bidders for the fifth generation of mobile technology and for previous generations for CHF 196 million. The frequencies were allocated in April 2019 and will remain with Swisscom until 2034.

Commitments for future capital expenditures

As of 31 December 2020, firm contractual commitments for future capital investments in intangible assets aggregated CHF 54 million (prior year: CHF 62 million).

Significant judgements or estimates

Management estimates the useful economic lives and residual values of intangible assets on the basis of the anticipated period over which economic benefits will accrue to the company from the use of the assets. Useful economic lives are reviewed annually on the basis of historical and forecast expectations concerning future technological developments, economic and legal changes as well as further external factors.

Accounting policies

Mobile-phone licences, self-developed software as well as other intangible assets are recorded at historical cost less accumulated amortisation. Intangible assets resulting from business combinations, such as brands and customer relationships, are recognised at cost less accumulated amortisation, which equates to fair market value as at the date of acquisition. Mobile-phone licences are amortised based on the term of the licence. It begins as soon as the related network is ready for operation, unless other information is at hand which would suggest the need to modify the useful lives. The impact from adjusting useful economic lives and residual values is recognised on a prospective basis. Amortisation is computed on a straight-line basis over the following estimated useful economic lives:

Category	Years
Software internally generated and purchased	3 to 7
Brands and customer relationships	5 to 10
Licenses	2 to 16
Other intangible assets	3 to 10

Whenever indications exist that the value of an asset may be impaired, the recoverable amount of the asset is determined. If the recoverable amount of the asset, which is the greater of the fair value less costs to sell and the value in use, is less than its carrying amount, the carrying amount is written down to the recoverable amount.

3.4 Goodwill

Goodwill is allocated to the cash generating units of Swisscom based upon their business activities. Goodwill arising in a business combination is allocated to each cash generating unit which can derive synergies from the business combination. The goodwill allocated to the cash generating units may be analysed as follows:

In CHF million	Residential Customers Swisscom Switzerland	Business Customers Swisscom Switzerland	Fastweb	Other cash-generating units ¹	Total

Net carrying amount at 1 January 2019	3,277	932	559	399	5,167

¹ Comprises the cash-generating units Wholesale Swisscom Switzerland and Swisscom Directories.

As of 1 January 2020, Swisscom amended its organisational structure in Switzerland and the segment formerly known Enterprise Customers was renamed Business Customers. In order to provide all business customers with a customer experience tailored to their needs, Swisscom has merged the SME and Corporate Customer segments. As a result, segment reporting now includes the telecommunications and solutions business with small and medium-sized enterprises in the Business Customers segment (previously reported under Residential Customers) (see Note 1.1). In connection with the merger, goodwill amounting to CHF 508 million was transferred to the cash-generating unit Business Customers Swisscom Switzerland.

Impairment testing

In the fourth quarter of 2020 and after the conclusion of business planning, individual goodwill amounts were subjected to an impairment test. The recoverable amount of a cash-generating unit is determined based on its value in use, applying the discounted cash flow (DCF) method. The projected free cash flows are estimated on the basis of the business plans approved by management, which as a rule cover a three-year period. A planning horizon of five years was used for the Fastweb impairment test. For free cash flows extending beyond the detailed planning period, a terminal value was computed by capitalising the normalised cash flows. A steady long-term growth rate that corresponds to the growth rates customary in the country or market was assumed. The projected cash flows and management assumptions are corroborated by external sources of information. The discount rate is derived from the Capital Asset Pricing Model (CAPM). This latter comprises the weighted value of own equity and external borrowing costs. For the risk-free interest rate which forms the basis of the discount rate, the yield from Swiss government bonds is taken (abroad: Germany) with a maturity of ten years and a zero-interest rate, subject to minimum interest rates of 1.5% (Switzerland) and 2.0% (abroad). For cash-generating units abroad, a risk premium for the country risk is then added.

Discount rates and long-term growth rates

Cash-generating unit	2020			2019		
	WACC pre-tax	WACC post-tax	Long-term growth rate	WACC pre-tax	WACC post-tax	Long-term growth rate
Residential Customers Swisscom Switzerland	5.25%	4.30%	0%	4.91%	3.93%	0%
Business Customers Swisscom Switzerland	5.25%	4.30%	0%	4.84%	3.93%	0%
Fastweb	6.91%	5.13%	0.5%	7.71%	5.87%	0.7%
Other cash-generating units	5.25– 7.27%	4.30– 5.84%	0%	4.86– 7.33%	3.93– 5.86%	0%

Results and sensitivity of impairment tests

Residential Customers and Business Customers Swisscom Switzerland

As at the measurement date, the recoverable amount at all cash-generating units, based on their value in use, is higher than the carrying amount relevant for the impairment test. Swisscom believes none of the anticipated changes in key assumptions which can rationally be expected would cause the carrying amount of the cash-generating units to exceed the recoverable amount.

Fastweb

As at the date of the impairment test, no impairment of goodwill resulted. The recoverable amount exceeded the carrying amount by EUR 2,241 million (CHF 2,398 million). In the prior year, the difference amounted to EUR 1,471 million (CHF 1,618 million). The following changes in material assumptions would lead to a situation where the value in use would equate to the carrying amount:

	2020		2019	
	Assumptions	Sensitivity	Assumptions	Sensitivity
Average annual revenue growth until 2025 with EBITDA margin unchanged compared to business plan	8.8%	5.6%	5.8%	3.2%
Normalised EBITDA margin	33%	28%	34%	30%
Normalised capital expenditure rate	20%	25%	20%	24%
Post-tax discount rate	5.13%	8.10%	5.87%	8.01%
Long-term growth rate	0.5%	–3.3%	0.7%	–2.1%

Significant judgements or estimates

The allocation of goodwill to the cash-generating units as well as the computation of the recoverable amount is subject to the judgement of Management. This encompasses the estimation of future cash flows, the determination of the discounting rate, and the growth rate on the basis of historic data and current forecasts.

Accounting policies

For the purposes of the impairment test, goodwill is allocated to the cash-generating units. The impairment test is performed annually on a mandatory basis. Whenever there is any indication during the year that goodwill may be impaired, the cash-generating unit is tested for impairment at that time. An impairment loss is recognised if the recoverable amount of a cash-generating unit is lower than its carrying amount. The recoverable amount is the greater of the fair value less costs to sell and the value in use.

3.5 Provisions and contingent liabilities

Provisions

1 See Note 4.1.

Provisions for dismantling and restoration costs

The provisions are computed by reference to estimates of future anticipated dismantling costs and are discounted using an average interest rate of 0.58% (prior year: 0.72%). Adjustments as a result of reassessments in the amount of CHF 64 million were recognised under property, plant and equipment with no impact on the income statement in 2020. Of this amount, CHF 23 million resulted from the use of different interest rates and CHF 24 million from the adjustment of the cost index used to calculate dismantling costs. An increase of estimated costs by 10% would result in an increase of CHF 71 million in the amount of the provision. A delay of another ten years in the timing of the dismantling would lead to an increase of CHF 28 million in the provisions.

Provisions for regulatory and competition law proceedings

In accordance with the revised Telecommunications Act, Swisscom provides access services (incl. interconnection) to other telecommunication service providers in Switzerland. In previous years, several telecommunication service providers demanded ComCom reduce the prices charged to them by Swisscom. In February 2019, ComCom issued its decision on the disputed access prices for 2013 to 2016. Swisscom has filed an appeal against this decision with the Federal Administrative Court. The price-setting procedure for 2017 and beyond is still pending, and has been suspended by OFCOM until the Federal Administrative Court issues its decision on the complaints regarding the access procedure for 2013 to 2016.

In 2009, the Competition Commission (COMCO) imposed a fine of CHF 220 million on Swisscom for abuse of a market-dominant position in the area of ADSL services during the period to 2007. Swisscom has filed an appeal against the fine before the Federal Administrative Court. In 2015, the Federal Administrative Court upheld the COMCO decision in principle, and reduced the fine imposed on Swisscom by COMCO from CHF 220 million to CHF 186 million. Swisscom did not consider the penalty justified and filed an appeal with the Federal Court. In December 2019, the Federal Court dismissed Swisscom's appeal in the last instance and confirmed the fine of CHF 186 million. As a result of the legally binding determination of market abuse, civil law claims were filed by telecommunications service providers in the second quarter of 2020. Based on legal assessments, Swisscom had set aside provisions in the past for any potential civil claims. Due to a reassessment of the time value of money, present value adjustments of CHF 31 million were recorded on these provisions in the second quarter of 2020.

On the basis of legal opinions, Swisscom has recognised provisions for regulatory and competition law proceedings. Any necessary payments will depend upon the date on which legally binding decrees and decisions are issued, and could probably occur within five years.

Other provisions

Other provisions primarily include provisions for contractual and non-income-related tax risks. Any necessary payments of the non-current portion of the provisions could likely occur within three years.

Contingent liabilities for regulatory and competition law proceedings

In accordance with the revised Telecommunications Act, Swisscom provides access services (incl. interconnection) to other telecommunication service providers in Switzerland. In previous years, several telecommunication service providers demanded ComCom reduce the prices charged to them by Swisscom. The legally binding definition of the prices for 2013 and subsequent years is still outstanding. COMCO is also conducting several proceedings against Swisscom. In the event that a legally enforceable finding of market abuse is reached, COMCO might impose a penalty on Swisscom. In addition, claims under civil law might be asserted against Swisscom. In April 2013, COMCO opened an investigation against Swisscom under the Federal Cartel Act concerning the broadcasting of live sporting events on pay TV. In May 2016, COMCO imposed a penalty of CHF 72 million on Swisscom in these proceedings. In its investigation as to the invitation to tender for the corporate network of the Swiss Post in 2008, COMCO reached the conclusion in November 2015 that Swisscom has a dominant position on the market for broadband access for business clients. As a result of this conduct, which was judged to be unlawful under competition law, COMCO imposed a penalty of CHF 8 million. Swisscom has challenged COMCO's rulings concerning live sports broadcasts on pay TV as well as the invitation to tender for the corporate network of Swiss Post in the Federal Administrative Court. It takes the view it has conducted itself in a lawful manner. On 25 August 2020, COMCO launched an investigation against Swisscom into allegations that it abused its market-dominant position for broadband connections to interconnect company sites. On 17 December 2020, COMCO also opened an investigation into Swisscom's optical fibre network and ordered precautionary measures. Swisscom has filed an appeal against these precautionary measures. As things stand, Swisscom does not believe it is probable that a court of final appeal will levy a penalty and, as in prior years, has therefore still not recognised a provision in its consolidated financial statements as at 31 December 2020. In view of the previous proceedings conducted by COMCO, further proceedings against Swisscom might be initiated.

Significant judgements or estimates

The provisions for dismantling and restoration costs relate to the dismantling of telecommunication installations and transmitter stations as well as the restoration to its original state of land held by third party owners. The level of the provisions is determined to a significant degree by the estimation of future dismantling and restoration costs, as well as the timing of dismantlement. The provisions and contingent liabilities for regulatory and anti-trust proceedings relate to proceedings in connection with regulated access services provided by Swisscom and proceedings initiated by COMCO. The legal and accounting assessment of these proceedings is associated with significant uncertainties in estimation and scope for discretion with regard to the probability of occurrence and the amount of a possible cash outflow. The provisions recognised in this way constitute the best estimate of the liability. Possible liabilities whose occurrence as at the balance-sheet date cannot be assessed, or liabilities for which the level cannot be reliably estimated, are disclosed as contingent liabilities.

Accounting policies

Provisions are recognised whenever a legal or constructive obligation arising from past events, the outflow of resources to settle the liability is probable, and the amount of the liability can be estimated reliably. Provisions are discounted if the effect is material.

Provisions for dismantling and restoration costs

Swisscom is legally obligated to dismantle transmitter stations and telecommunication installations located on land belonging to third parties following decommissioning, and to restore to its original state the property owned by third parties in the locations where these installations are erected. The costs of dismantling are capitalised as part of the acquisition costs of the installations, and are amortised over their useful lives. The provisions are measured at the present value of the aggregate future costs, and are reported under non-current provisions. Whenever the provision is re-measured, the present value of the changes in the liability is either added to or deducted from the cost of the related capitalised item of property, plant and equipment. The amount deducted from the cost of the related asset may not exceed its carrying amount. Any excess is taken directly to income.

Provisions for termination benefits

Costs in connection with the implementation of restructuring programmes are first expensed when management commits itself to a restructuring plan, it is probable that a liability has been incurred, the amount thereof can be reliably estimated and the implementation of the programme has commenced, or the individuals involved have been advised in sufficient detail as to the main terms of the restructuring programme. A public announcement and/or communication to personnel associations are deemed to be equivalent to commencing the implementation of the programme.

4 Employees

Swisscom currently has around 19,000 full-time equivalent employees, of whom around 16,000 are in Switzerland. This chapter contains information on employee headcount and personnel expense, the compensation paid to key management personnel as well as retirement-benefit obligations.

4.1 Employee headcount and personnel expense

Termination benefits

Swisscom supports employees affected by restructuring through a social plan. In addition to other benefits, the social plan benefits include continued salary payments beyond the contractual notice period for a maximum period of time, which depends on the seniority and age of the employee concerned. Under certain conditions, older employees affected by job cuts may transfer to the subsidiary Worklink AG at reduced guaranteed continued salary payments. Worklink AG aims to place participants with third parties for temporary work assignments, whereby the participants are paid a share of the turnover as a wage supplement. Net expenditure for personnel reduction was minus CHF 1 million (prior year: CHF 56 million). This is comprised of newly established provisions of CHF 22 million, less the release of unused provisions to the value of CHF 23 million. These personnel downsizing measures are connected with Swisscom's aim of reducing the cost base by a further CHF 100 million per year by 2022.

4.2 Key management compensation

In CHF thousand	2020	2019
Current compensation	1,357	1,365
Share-based payments	810	719
Social security contributions	221	128
Total compensation to members of the Board of Directors	2,388	2,212
Current compensation	5,038	5,347
Share-based payments	731	757
Benefits paid following retirement from Group Executive Board	190	–
Pension contributions	796	873
Social security contributions	510	539
Total compensation to members of the Group Executive Board	7,265	7,516
Total compensation to members of the Board of Directors and of the Group Executive Board	9,653	9,728

Swisscom's key management personnel are the members of the Group Executive Board and Board of Directors of Swisscom Ltd. Compensation paid to members of the Board of Directors consists of a base salary plus functional allowances. One third of the entire compensation of the Board of Directors is settled in the form of equity shares. Compensation paid to the members of the Group Executive Board consists of a fixed basic salary paid in cash, a variable performance-related component settled in cash and shares, payments in kind and non-cash benefits, as well as pension and social insurance contributions. 25% of the variable performance-related share of the members of the Group Executive Board is settled in shares. The Group Executive Board members may elect to increase this share to 50%. The disclosures required by the Swiss Ordinance against Excessive Compensation in Listed Companies (OaEC) are set out in the chapter Remuneration Report. Shares in Swisscom Ltd held by the members of the Board of Directors and Group Executive Board are set out in the notes to the Consolidated Financial Statements of Swisscom Ltd.

4.3 Post-employment benefits

Pension plans comPlan

The majority of employees in Switzerland are insured under the Swisscom pension plan against the risks of old age, death and disability. The pension plan is implemented by the comPlan foundation. The supreme governing body of the pension fund is the Foundation Council, which is made up of an equal number of representatives from the employees and the employer. The pension fund rules, together with the legal provisions concerning occupational pension plans, constitute the formal regulatory framework of the pension plan. Individual retirement savings accounts are maintained for each beneficiary, which savings contributions varying with age are credited to as well as any interest which accrues. The rate of interest to be applied to the retirement savings accounts is set each year by the Foundation Council, having regard to the financial situation of the pension fund. The amounts credited to the individual savings accounts are funded by savings contributions from both the employer and employees. In addition, the employer pays risk contributions to fund death and disability benefits.

The standard retirement age is 65. Employees are entitled to early retirement with a reduced old-age pension. The amount of the old-age pension is the result of multiplying the individual retirement savings account at the time of retirement by a conversion rate set out in the pension-fund rules. The retirement benefits can also be paid out in the form of a capital payment either in full or in part. In case of early retirement, the employer also finances an OASI bridging pension until the standard retirement age. The amount of disability pensions is determined as a percentage of the insured salary and is independent of the number of years of service.

The formal regulatory framework contains various provisions concerning risk sharing between the beneficiaries and the employer. In the event of a funding shortfall, computed in accordance with Swiss accounting standards for pension funds (Swiss GAAP FER 26), the Foundation Council lays down measures which shall lead to the elimination of this funding deficit and the restoration of financial equilibrium within a timeframe of five to seven years. Such measures may include a reduced or zero interest rate on retirement savings accounts, a reduction in future benefits, the levying of restructuring contributions or a combination of these measures. Should a structural

funding shortfall exist as a result of insufficient current interest-induced funding, the top priority is to remedy this situation by adapting future benefits. The employer's restructuring contributions must, at a minimum, be equal to the sum of employee restructuring contributions. Under the formal regulatory framework, the employer has no legal obligation to pay additional contributions to eliminate more than 50% of a funding shortfall. From past common business practice, Swisscom has a de facto obligation over and above the legal minimum to pay additional or restructuring contributions in the case of funding shortfalls and structural funding deficits. The upper limit of the employer's share of future benefit costs within the meaning of IAS 19.87(c) is assumed to be at the level of the de facto obligation.

In accordance with the Swiss accounting standards (Swiss GAAP FER 26) which are relevant for the pension fund, as at 31 December 2020 comPlan had a technical coverage ratio of 112% (prior year: 110%). The main reasons for the difference compared with IFRS are the use of a higher discount rate as well as a differing actuarial measurement method with the deferred recognition of the costs of future retirement benefits.

Other pension plans

Other pension plans exist for individual Swiss subsidiary companies which are not affiliated to comPlan and for Fastweb. Employees of the Italian subsidiary Fastweb have acquired entitlements to future pension benefits up to the end of 2006, which are recorded in the balance sheet as defined benefit obligations.

The Foundation Council determines the investment strategy and tactical bandwidths within the framework of the legal provisions. Within its terms of reference, the Investment Commission undertakes the asset allocation, and is the central steering, coordination and monitoring body for the management of the pension plan assets. The investment strategy pursues the goal of achieving the highest possible return on assets within the framework of its risk tolerance, and thus of generating income on a long-term basis to meet all financial obligations. This is achieved through a broad diversification of risks over various investment categories, markets, currencies and industry segments in both developed and emerging markets. The interest rate duration of interest-bearing assets is 7.8 years (prior year: 7.24 years), and the average rating of these assets is A– (unchanged from prior year). Within the overall portfolio, all foreign currency positions are hedged against the Swiss franc following a currency strategy to the extent necessary to meet a pre-determined ratio of 85% (CHF or CHF-hedged). Following this investment strategy, comPlan expects its results prepared in accordance with Swiss GAAP FER to show a target value for the value fluctuation reserve of 18.4% of total assets.

Additional information on plan assets

As at 31 December 2020, plan assets include Swisscom Ltd shares and bonds with a fair value of CHF 10 million (prior year: CHF 10 million). The effective income from plan assets was CHF 436 million in 2020 (prior year: CHF 1,233 million). In 2021, Swisscom expects to make payments to the pension funds for statutory employee contributions totalling CHF 273 million.

Assumptions underlying actuarial computations

Assumptions	2020		2019	
	comPlan	Other plans	comPlan	Other plans
Discount rate	0.19%	0.34%	0.22%	0.77%
Expected rate of salary increases	1.08%	–%	1.08%	–%
Expected rate of pension increases	–%	–%	–%	–%
Interest on old age savings accounts	0.36%	–%	0.37%	–%
Share of employee contribution to funding shortfall	40%	–%	40%	–%
Life expectancy at age of 65 – men (number of years)	22.40	22.40	22.30	22.30
Life expectancy at age of 65 – women (number of years)	24.20	24.20	24.10	24.10

The discount rate is based upon CHF-denominated corporate bonds with an AA rating of domestic and foreign issuers and listed on the Swiss Exchange SIX. The development of salaries corresponds to the historical average of recent years. No future pension increases are anticipated, as comPlan has insufficient fluctuation reserves available under pension law. The lower limit is the statutory minimum interest rate on BVG retirement savings accounts. The interest rate on the individual savings balances was determined taking into account the BVG minimum interest rate for the mandatory BVG portion. Life-expectancy assumptions are arrived at through a projection of future mortality improvements in accordance with the Continuous Mortality Investigation Model (CMI) and is based on improvements in mortality observed in Switzerland in the past. The computations are made with a future long-term rate of mortality improvement of 1.75%. The insured person can draw the retirement benefit in full or in part by means of a one-off lump-sum payment. Compared with the previous year, the assumption for the lump-sum withdrawal ratio was increased from 14% to 22%. This resulted in an actuarial gain of CHF 115 million recognised in other comprehensive income.

The risk-sharing attributes contained in the formal regulatory framework relating to the handling of funding shortfalls were taken into account in the financial assumptions in two steps. As a first step, it is assumed that a gradual lowering of future pensions by 9.74% (prior year: 8.80%) over a period of ten years will take place in order to close the interest-induced structural funding gap. This is based upon a projection of the future conversion rate using a mixed rate for the mandatory and extra-mandatory portions. The conversion rate in the mandatory portion applies the current legal conversion rate. In the extra-mandatory portion, the conversion rate is computed with a discount rate of 0.19%. As a second step, the present value of the remaining funding gap between the regulatory contributions and the benefits adjusted in the first step is shared between the employer and the employees. The legal and de-facto obligation of the employer to pay additional contributions is unchanged and assumed to be limited to 60% of the funding gap. This is based on the legal and regulatory provisions concerning the elimination of funding shortfalls as well as the measures actually decided upon by the Foundation Council and the employer in the past. Based on an assumption of a limited employer contribution to the funding shortfall, there is a reduction in defined benefit obligations of CHF 581 million (prior year: CHF 530 million), which corresponds to the assumed employee contributions. The change of the employee share is recognised in other comprehensive income.

Sensitivity analysis comPlan

Sensitivity analysis 2020

In CHF million	Defined benefit obligations		Current service cost	
	Increase assumption	Decrease assumption	Increase assumption	Decrease assumption
Discount rate (change +/-0.5%)	(573)	668	(35)	41
Expected rate of salary increases (change +/-0.5%)	39	(37)	6	(6)
Expected rate of pension increases (change +0.5%; -0.0%)	558	–	26	–
Interest on old age savings accounts (change +0.5%; -0.0%)	21	–	7	–
Share of employee contribution to funding shortfall (change +/-10%)	106	(106)	–	–
Life expectancy at age of 65 (change +/-0.5 year)	142	(143)	4	(4)

Sensitivity analysis 2019

In CHF million	Defined benefit obligations		Current service cost	
	Increase assumption	Decrease assumption	Increase assumption	Decrease assumption
Discount rate (change +/-0.5%)	(598)	698	(37)	44
Expected rate of salary increases (change +/-0.5%)	42	(40)	6	(6)
Expected rate of pension increases (change +0.5%; -0.0%)	578	–	28	–
Interest on old age savings accounts (change +/-0.5%)	25	–	7	–
Share of employee contribution to funding shortfall (change +/-10%)	133	(133)	–	–
Life expectancy at age of 65 (change +/-0.5 year)	143	(144)	5	(5)

The sensitivity analysis takes into consideration the movement in defined benefit obligations as well as current service costs in adjusting the actuarial assumptions by half a percentage point and half a year, respectively. In the process only one of the assumptions is adjusted each time, the other parameters remaining unchanged. In the sensitivity analysis, no change was made in view of a negative movement in pension increases as it is not possible to reduce current pensions. The assumed gradual reduction in conversion rates is left unchanged in the sensitivities of the discount rate shown. An increase in the discount rate of 0.5% in the calculation of the conversion rate reduction leads to an increase in the pension obligation of CHF 61 million.

Significant judgements or estimates

The determination of post-employment retirement benefit obligations requires an estimation of the future service periods, the development of future salaries and pensions, interest accruing on the employee savings accounts, the timing of contractual pension benefit payments and the employees' share of the funding shortfall. This evaluation is made on the basis of prior experience and anticipated future trends. Anticipated future payments are discounted with the yields of Swiss franc-denominated corporate bonds from domestic and foreign issuers quoted on the Swiss Exchange with an AA rating. The discount rates match the anticipated payment maturities of the liabilities.

Accounting policies

Actuarial computations of pension expenses and the related defined benefit obligations are carried out using the projected unit credit method. Current service costs, past service costs arising from pension plan amendments and plan settlements as well as administrative costs are reported in the income statement under personnel expense and interest accruing on net obligations as a finance expense. Actuarial gains and losses and the return on plan assets, excluding the amounts reflected in net interest income, are reported under other comprehensive income. The assumptions regarding net future benefits are made in compliance with the formal set of regulations governing the pension plan. As regards the Swiss pension plans, the relevant formal regulations comprise the rules of the pension fund as well as the relevant laws, ordinances and directives concerning occupational benefit plans, in particular the provisions contained therein related to funding and measures to be taken to eliminate funding shortfalls. Risk-sharing features in the formal regulatory framework are taken into account when arriving at financial assumptions; these limit the employer's share of the costs of future benefits as well as involving employees in any necessary payment of additional contributions in order to eliminate funding deficits. Should the level of committed long-term disability benefits (disability pensions), irrespective of the number of years of service, be the same for all insured employees, the costs for these benefits are recognised on the date on which the event causing the disability occurs.

5 Scope of consolidation

The following chapter sets out details of the Group structure of Swisscom and includes disclosures concerning subsidiaries, joint ventures and associates. In addition, it outlines material changes in Group structure and the corresponding impact on the consolidated financial statements.

5.1 Group structure

Swisscom Ltd is the parent company of the Group. It essentially holds direct majority shareholdings in Swisscom (Switzerland) Ltd, blue Entertainment Ltd, Swisscom Broadcast Ltd and Swisscom Directories Ltd. Fastweb S.p.A. (Fastweb) is held indirectly via Swisscom (Switzerland) Ltd as well as an intermediate company in Italy. Swisscom Re Ltd in Liechtenstein is the Group's in-house reinsurance company. Swisscom raises finance in EUR through Swisscom Finance B.V.

5.2 Changes in the scope of consolidation

Net cash flows from the acquisition and disposal of participations may be analysed as follows:

In CHF million	2020	2019
Expenses for business combinations net of cash and cash equivalents acquired	(13)	(25)
Expenses for deferred consideration arising on business combinations	(26)	(369)
Sale of subsidiaries minus disposal of currency	–	(3)
Expenses for shareholdings accounted for using the equity method	(15)	(15)
Acquisition of non-controlling interests	(1)	(1)
Total cash flow from the purchase and sale of shareholdings, net	(55)	(413)

Expenses for deferred consideration arising on business combinations includes in 2019 the payment of CHF 240 million paid to Tamedia for the acquisition of the outstanding share of 31% in Swisscom Directories Ltd. See Note 2.2.

Acquisitions and disposals of subsidiaries

Acquisitions and disposals of subsidiaries in 2020 are not individually material. These include the full acquisition of Cutaway S.r.l., the 70% acquisition of 7Layers S.r.l. in Italy and the sale of Mila AG. Cutaway S.r.l. was merged with Fastweb S.p.A. following the acquisition.

Accounting policies

Consolidation

Subsidiaries are all companies over which Swisscom Ltd has the effective ability to control the financial and business policies. Control is generally assumed where Swisscom Ltd directly or indirectly holds the majority of the voting rights or potential voting rights of the company. Companies acquired and sold are included in consolidation from the date on which they are acquired and deconsolidated from the date they are disposed of, respectively. Intragroup balances and transactions, income and expenses, shareholdings and dividends as well as unrealised gains and losses are fully eliminated. Non-controlling interests in subsidiaries are reported within equity in the consolidated balance sheet, but separately from equity attributable to the shareholders of Swisscom Ltd. The non-controlling interests in net income or loss are shown in the consolidated income statement as a component of the consolidated net income or loss. Changes in shareholdings of subsidiary companies are reported as transactions within equity insofar as control existed previously and continues to exist. Put options granted to owners of non-controlling interests are disclosed as financial liabilities. The balance sheet date for all consolidated subsidiaries is 31 December. There are no material restrictions on the transfer of funds from the subsidiaries to the parent company.

Shareholdings over which Swisscom exercises significant influence but does not have control are accounted for using the equity method. A significant influence is generally assumed to exist whenever between 20% and 50% of the voting rights are held.

Business combinations

Business combinations are accounted for using the acquisition method. Acquisition costs are recognised at fair value as at the date of the business combination. The purchase consideration includes the amount of cash paid and the fair value of the assets ceded, liabilities incurred or assumed and own equity instruments ceded. Liabilities depending on future events based on contractual agreements are recognised at fair value. All identifiable assets and liabilities that satisfy the recognition criteria are recognised at their fair values at the time of acquisition. The difference between the cost of acquisition and the fair value of the identifiable assets and liabilities acquired or assumed is accounted for as goodwill, after taking into account any non-controlling interests.

5.3 Equity-accounted investees

In CHF million	2020	2019
Balance at 1 January	156	174
Additions	16	27
Dividends	(15)	(18)
Share of net results	9	4
Share of other comprehensive income	(5)	2
Impairment losses	(5)	(32)
Dilutive gains	–	3
Foreign currency translation adjustments	(1)	(4)
Balance at 31 December	155	156

In 2020, an aggregate amount of CHF 4 million (prior year: CHF –28 million) was recognised as the attributable share of net results in equity-accounted investees.

On 1 September 2020, Fastweb, Telecom Italia (TIM) and private equity firm KKR signed an agreement to establish FiberCop S.p.A. TIM contributes its secondary access network. The partners will also integrate Flash Fiber S.r.l., a company jointly owned by TIM (80%) and Fastweb (20%), into the new company. FiberCop will gradually upgrade the access network with FTTH technology. Swisscom is set to supply 14 million homes and businesses with FTTH by 2025. The closing of the transaction is subject to approvals from the relevant authorities in the EU and Italy, including antitrust clearance.

6 Other disclosures

This chapter details information which is not already disclosed in the other parts of the report. For instance, it includes disclosures regarding income taxes and related parties.

6.1 Income taxes

Income tax expense

In CHF million	2020	2019
Current income tax expense	325	332
Adjustments recognised for current tax of prior periods	(5)	(16)
Deferred income tax expense	(49)	(261)
Total income tax expense recognised in income statement	271	55
Thereof Switzerland	242	28
Thereof foreign countries	29	27

In addition, other comprehensive income includes current and deferred income taxes, which may be analysed as follows:

In CHF million	2020	2019
Foreign currency translation adjustments of foreign subsidiaries	–	(4)
Actuarial gains and losses from defined benefit pension plans	69	47
Change to the fair value of equity instruments	(1)	–
Change in cash flow hedges	–	1
Total income tax expense recognised in other comprehensive income	68	44

Analysis of income taxes

The applicable income tax rate which serves to prepare the following analysis of income tax expense is the weighted average income tax rate calculated on the basis of the Group's operating subsidiaries in Switzerland. The applicable income tax rate is 18.7% (prior year: 20.0%). The decline in the applicable income tax rate can be attributed to a reduction in the tax rates in various Swiss cantons.

In CHF million	2020	2019
Income before income taxes in Switzerland	1,655	1,598
Income before income taxes foreign countries	144	126
Income before income taxes	1,799	1,724
Applicable income tax rate	18.7%	20.0%
Income tax expense at the applicable income tax rate	336	345
Reconciliation to reported income tax expense		
Effect from result of shareholdings accounted for using the equity method	(2)	6
Effect of changes in tax law in Switzerland	(29)	(269)
Effect of use of different income tax rates in Switzerland	7	–
Effect of use of different income tax rates in foreign countries	1	2
Effect of non-recognition of tax loss carry-forwards	3	8
Effect of recognition and offset of tax loss carry-forwards not recognised in prior years	(14)	–
Effect of exclusively tax-deductible expenses and income	(26)	(21)
Effect of income tax of prior periods	(5)	(16)
Total income tax expense	271	55
Effective income tax rate	15.1%	3.2%

On 1 January 2020, various legislative changes affecting corporate taxation came into force. These changes fundamentally abolish tax privileges for companies, such as the privileged taxation of the profits of holding companies. In return, most of the cantons will reduce the corporate income tax rates. Temporary transitional regulations additionally dampen the financial impact. Changes in the law, reductions in tax rates and transitional rules led to positive tax effects of CHF 29 million in the Swisscom consolidated financial statements for 2020 (prior year: CHF 269 million). These tax effects result from the revaluation of existing deferred income tax liabilities due to tax rate adjustments. Also, valuation adjustments made in line with the transitional rule on ordinary profit taxation on the holding company led to the recognition of new deferred tax assets.

Current income tax assets and liabilities

In CHF million	2020	2019
Current income tax liabilities at 1 January, net	170	226
Recognised in income statement	320	316
Recognised in other comprehensive income	1	(1)

Total unrecognised tax loss carry-forwards	46	145
Thereof Switzerland	26	128
Thereof foreign countries	20	17

Other disclosures

Deferred tax liabilities of CHF 6 million (prior year: none) were recognised on the undistributed earnings of subsidiaries as at 31 December 2020. Temporary differences of subsidiaries and equity-accounted investees for which no deferred tax liabilities are recognised as at 31 December 2020 amounted to CHF 2,102 million (prior year: CHF 3,117 million). In 2020, the tax authorities definitively assessed some tax years. The assessments have resulted in no material uncertain tax positions remaining as at 31 December 2020.

Accounting policies

Income taxes encompass all current and deferred taxes which are based on income. Taxes which are not based on income, such as taxes on real estate and on capital, are recorded as other operating expenses. Deferred taxes are computed using the balance sheet liability method, whereby as a general rule deferred taxes are recognised on all temporary differences. Temporary differences arise from differences between the carrying amount of a balance sheet position in the consolidated financial statements and its value as reported for tax purposes, which will reverse in future periods. Deferred tax assets are only recognised as assets to the extent that it is probable that they can be offset against future taxable income. Income tax liabilities on distributions of undistributed profits of Group companies are only recognised if the distribution of profits is to be made in the foreseeable future. If it is probable that the tax authority will accept the chosen tax treatment, the tax amount in the consolidated financial statements is the same as that entered in the tax return submitted. However, if this is not probable, the amounts will be different. The uncertainty is taken into account in the measurement, which requires a best-possible estimate of the expected cash outflow. If there are few possible outcomes of the tax treatment, the most likely outcome is used to determine the tax liability. If there are a large number of possible tax consequences, an expected value is determined on the basis of a probability calculation. Current and deferred tax assets and liabilities are offset whenever they relate to the same taxing authority and taxable entity.

6.2 Related parties

Majority shareholder and equity-accounted investees

Majority shareholder

Pursuant to the Swiss Federal Telecommunication Enterprises Act (TEA), the Swiss Confederation (“the Confederation”) is obligated to hold a majority of the share capital and voting rights of Swisscom. On 31 December 2020, the Confederation, as majority shareholder, continued to hold 51.0% of the issued shares of Swisscom Ltd. Any reduction of the Confederation’s holding below a majority shareholding would require a change in law, which would need to be voted upon by the Swiss Parliament and would also be subject to the right of optional referendum by Swiss voters. As the majority shareholder, the Confederation has the power to control the decisions of the annual general meetings of shareholders which are taken by the absolute majority of validly cast votes. This relates primarily to resolutions concerning dividend distributions and the election of the members of the Board of Directors. Swisscom supplies telecommunication services to, and also procures services from, the Confederation. The Confederation comprises the various ministries and administrative bodies of the Confederation and the other companies controlled by the Confederation (primarily the Swiss Post, Swiss Federal Railways, RUAG and Skyguide). All transactions are conducted on the basis of normal customer/supplier relationships and on conditions applicable to unrelated third parties. In addition, financing transactions are entered into with the Swiss Post under market conditions.

Equity-accounted investees

Services provided to/by equity-accounted investees are based upon market prices. Such participations are listed in Note 5.3.

Transactions and balances

In CHF million	Income	Expense	Receivables	Liabilities
2020 financial year

Total 2019/balance at 31 December 2019	282	210	251	172

Occupational pension schemes and compensation payable to individuals in key positions

Transactions between Swisscom and the various pension funds are detailed in Note 4.3. Compensation paid to individuals in key positions are disclosed in Note 4.2.

6.3 Other accounting policies

Foreign currency translation

Foreign currency transactions which are not denominated in the functional currency are translated into the functional currency using the exchange rate prevailing at the dates of the transactions. Monetary items as at the balance sheet date are translated into the functional currency at the exchange rate prevailing at the balance sheet date, while non-monetary items are translated using the exchange rate on the date of the transaction. Translation differences are recognised in the income statement. Assets and liabilities of subsidiaries and equity-accounted investees reporting in a different functional currency are translated at the exchange rates prevailing on the balance sheet date, whereas the income statement and the cash flow statement are translated at the average exchange rate. Translation differences arising from the translation of net assets and income statements are recorded in other comprehensive income.

Significant foreign currency translation rates

Currency	Closing rate			Average rate	
	31.12.2020	31.12.2019	31.12.2018	2020	2019

Amended International Financial Reporting Standards and Interpretations, whose application is not yet mandatory

The following International Financial Reporting Standards and Interpretations published up to the end of 2020 are mandatory for annual periods beginning on or after 1 January 2021:

Standard	Name	Effective from
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16	IBOR Reform: Phase 2	1 January 2021
Amendments to IFRS 3	References to conceptual framework	1 January 2022
Amendments to IAS 16	Property, plant and equipment: Income before planned use	1 January 2022
Amendments to IAS 37	Onerous contracts: Contract performance costs	1 January 2022
Various	Amendments to IFRS 2018-2020	1 January 2022
IFRS 17	Insurance contracts	1 January 2023
Amendments to IAS 1	Classification of liabilities as current or non-current	1 January 2023
Amendments to IFRS 10 and IAS 28	Sale or deposit of assets between an investor and an associated company or joint venture	still open

Swisscom will review its financial reporting for the impact of those new and amended standards which take effect on or after 1 January 2021 and which Swisscom did not choose to adopt earlier than required. At present, Swisscom anticipates no material impact on the consolidated financial statements.

Report of the statutory auditor

to the General Meeting of Swisscom Ltd

Ittigen

Report on the audit of the consolidated financial statements

Opinion

We have audited the consolidated financial statements of Swisscom Ltd and its subsidiaries (the Group), which comprise the consolidated statement of comprehensive income for the year ended 31 December 2020, the consolidated balance sheet as at 31 December 2020, the consolidated statement of cash flows and the consolidated statement of changes in equity for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements (pages 112 to 171) give a true and fair view of the consolidated financial position of the Group as at 31 December 2020 and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and comply with Swiss law.

Basis for opinion

We conducted our audit in accordance with Swiss law, International Standards on Auditing (ISAs) and Swiss Auditing Standards. Our responsibilities under those provisions and standards are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements" section of our report.

We are independent of the Group in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, as well as the International Code of Ethics for Professional Accountants (including International Independence Standards) of the International Ethics Standards Board for Accountants (IESBA Code) and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit approach

Overview

Overall materiality for the consolidated financial statements: CHF 90 million

We conducted full scope audit work at four Group companies in two countries. These Group companies represent over 95% of the Group's revenue. In addition, specified procedures were performed on selected balance sheet and income statement line items for one additional Group company located in Switzerland.

As key audit matters, the following areas of focus were identified:

- Impairment testing of Fastweb goodwill
- Revenue recognition – Solutions business with Business Customers
- Impairment testing of technical installations and intangible assets
- Assessment of litigation arising from regulatory and competition law proceedings

PricewaterhouseCoopers AG, Birchstrasse 160, Postfach, 8050 Zürich
Telefon: +41 58 792 44 00, Telefax: +41 58 792 44 10, www.pwc.ch

PricewaterhouseCoopers AG is a member of the global PricewaterhouseCoopers network of firms, each of which is a separate and independent legal entity.

Materiality

The scope of our audit was influenced by our application of materiality. Our audit opinion aims to provide reasonable assurance that the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

On the basis of our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the consolidated financial statements as a whole.

Overall Group materiality	CHF 90 million
How we determined it	5% of profit before tax
Rationale for the materiality benchmark applied	We chose profit before tax as the benchmark because, in our view, it is the benchmark against which the performance of the Group is most commonly measured, and it is a generally accepted benchmark for materiality considerations.

We agreed with the Audit Committee that we would report to them misstatements above CHF 2.4 million identified during our audit as well as any misstatements below that amount which, in our view, warranted reporting for qualitative reasons.

Audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

The Group consists of three operating segments (Swisscom Switzerland, Fastweb, Other Operating Segments) and operates mainly in Switzerland and Italy. Swisscom (Schweiz) Ltd generates most of the revenue. Another company that we identified as significant is Fastweb S.p.A. (Fastweb).

The audits of Swisscom (Schweiz) Ltd and Swisscom Ltd were performed by the Group audit team. The audit of Fastweb was performed by the PwC component auditor in Italy, to whom we provided instructions and with whom we are in regular contact to discuss the treatment of transactions that are material to the consolidated financial statements as well as questions regarding valuation and disclosure. In addition, we participate in important discussions with Fastweb's management. The audit of these three companies addresses the major part of the consolidated financial statements. Another company in Switzerland is audited by a Swiss PwC component auditor, whom we have instructed and with whom we are also in regular contact. Finally, we identified an additional subsidiary with significant balance sheet and income statement items, which is audited by the Group audit team. Group-wide topics, such as treasury, taxes, pension obligations and investments (including goodwill) or the implementation of new accounting requirements are addressed by the Group audit team.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Impairment testing of Fastweb goodwill

Key audit matter

The impairment testing of goodwill relating to Fastweb was deemed a key audit matter for the following reasons:

- As at 31 December 2020, the goodwill relating to the Fastweb operating segment amounted to CHF 537 million (2019: CHF 538 million), which is a significant amount.
- In performing the annual impairment test of the Fastweb goodwill, management has considerable scope for judgement regarding the expected future cash flows, the discount rate (WACC) used and the forecasted growth.

Please refer to note 3.4 'Goodwill' (page 150) in the notes to the consolidated financial statements.

How our audit addressed the key audit matter

During our audit, we assessed with regard to the impairment test whether a correct valuation method was used, the calculation was coherent and the assumptions made were appropriate.

In doing so, we challenged the input data and assumptions relating to the underlying cash flows of the impairment test, taking into account the impact of the COVID-19 pandemic on Fastweb's business, as well as the future growth rates. In addition, we compared the results of the current year with the forecasts made in the previous year in order to assess the appropriateness of the previous year's assumptions.

With regard to the discount rate used, we analysed together with our own valuation specialists how it was derived and compared it with our own calculation.

We also examined whether the information on impairment testing in the notes to the consolidated financial statements was disclosed correctly and whether the sensitivity analyses presented indicate appropriately the risks of impairment.

We consider the valuation method and the assumptions used by management to test for the impairment of the Fastweb goodwill to be appropriate.

Revenue recognition – Solutions business with Business Customers

Key audit matter

For the 2020 financial year, Swisscom reports net revenue of CHF 11,100 million (2019: CHF 11,453 million). Of this amount, CHF 1,058 million (2019: CHF 1,049 million) is generated by the Solutions business with Business Customers. The Solutions business with Business Customers comprises integrated communications solutions (e.g. IT outsourcing) for large enterprises in Switzerland.

We consider revenue recognition in the Solutions business with Business Customers to be a key audit matter for the following reasons:

- The specific projects within the Solutions business are based on complex individual contracts that may include multiple performance obligations. The accounting treatment of these contracts requires management to estimate the expected transaction price and the timing of revenue recognition of the individual performance obligations.
- The projects typically last between three and seven years. To ensure a loss-free valuation of ongoing projects, management has significant scope for judgement in its assessment of the future costs of each project.

Please refer to note 1.1 'Segment information' (page 118) in the notes to the consolidated financial statements.

How our audit addressed the key audit matter

We assessed the design and effectiveness of the controls implemented to ensure the correct recognition of revenue in the Solutions business with Business Customers.

Further, we performed analytical audit procedures. On the basis of internal and external reports, we defined our expectations and critically assessed deviations from them.

For a sample of contracts entered into in the 2020 financial year, we assessed the accounting treatment applied by Swisscom. In doing so, we assessed whether management's estimate of the expected transaction price and of the timing of revenue recognition relating to individual performance obligations is appropriate.

To address the significant scope for judgement when assessing future costs to ensure a loss-free valuation, we performed the following audit procedures:

- We gained an understanding of the process implemented by management to assess future developments in the Solutions business and critically assessed that process.
- We discussed with Swisscom their expectations regarding the future development of individual projects and critically assessed those expectations on the basis of current developments.
- Using a sample of projects, we compared Swisscom's forecasts from the previous year with actual developments in the current financial year and analysed any variances.

Finally, on the basis of a sample, we assessed whether the revenue in the Solutions business with Business Customers was recorded correctly. To do so, we checked cash receipts for individual revenue transactions and obtained external balance confirmations from Swisscom customers.

We consider management's estimates relating to the recognition of revenue in the Solutions business with Business Customers to be appropriate.

Impairment testing of technical installations and intangible assets

Key audit matter	How our audit addressed the key audit matter
<p>We consider the impairment testing of technical facilities and intangible assets to be a key audit matter for the following reasons:</p> <ul style="list-style-type: none"> Swisscom recognises as of 31 December 2020 technical installations with a net book value of CHF 8,611 million (2019: CHF 8,407 million) and intangible assets with a net book value of CHF 1,745 million (2019: CHF 1,842 million). Both represent significant amounts. Management has significant scope for judgement when assessing and determining the useful life of technologies that are in use. <p>Please refer to note 3.2 'Property, plant and equipment' (page 146) and note 3.3 'Intangible assets' (page 148) in the notes to the consolidated financial statements.</p>	<p>We assessed the design and effectiveness of the controls implemented to ensure the correct impairment testing of technical installations and intangible assets.</p> <p>We also discussed with management the estimates of the future useful lives of existing technologies and critically assessed these on the basis of current developments at Swisscom and other telecommunications companies.</p> <p>In addition, we assessed the completeness and appropriateness of changes in useful lives and actual impairments in the 2020 financial year.</p> <p>We consider management's assessment of the expected period over which Swisscom derives economic benefits from the use of existing technologies to be appropriate.</p>

Assessment of litigation arising from regulatory and competition law proceedings

Key audit matter

Swisscom recorded as at 31 December 2020 provisions amounting to CHF 1,216 million (2019: CHF 1,134 million). Of this amount, CHF 233 million (2019: CHF 206 million) relates to provisions for litigation arising from regulatory and competition law proceedings.

Swisscom provides regulated access services to other telecommunications service providers in accordance with the Telecommunications Act. The prices charged by Swisscom are subject to reviews by the Federal Communications Commission (ComCom). If the Commission issues a ruling against Swisscom, the prices charged must be reduced with retroactive effect.

Swisscom is also a party to proceedings conducted by the Federal Competition Commission (COMCO). In the event of a final verdict establishing market abuse by Swisscom, COMCO may impose sanctions. A final verdict establishing market abuse issued by COMCO could lead to civil claims against Swisscom.

We consider the assessment of the financial implications of litigation arising from regulatory and competition law proceedings to be a key audit matter because management has significant scope for judgement in estimating the probability, the timing and the amount of a potential cash outflow due to litigation.

Please refer to note 3.5 'Provisions, contingent liabilities and contingent assets' (page 152) in the notes to the consolidated financial statements.

How our audit addressed the key audit matter

To address the significant scope for judgement in estimating the probability, the timing and the amount of a potential cash outflow due to litigation, we performed together with an internal legal expert the following audit procedures:

- We discussed pending litigation with management and Swisscom's internal and external legal counsel.
- We obtained written statements from Swisscom's external and internal legal counsel.
- We gained an understanding of the process and controls implemented by management to identify, assess and recognise pending litigation, and critically assessed it.

To assess the amount of the provisions established, we considered whether the underlying data were adequately factored into the calculation of the provisions.

Finally, we assessed the recognition and disclosure in the consolidated financial statements of litigation arising from regulatory and competition law proceedings.

We consider management's approach to the treatment in the consolidated financial statements of litigation arising from regulatory and competition law proceedings to be appropriate.

Other information in the annual report

The Board of Directors is responsible for the other information in the annual report. The other information comprises all information included in the annual report, but does not include the consolidated financial statements and the compensation report of Swisscom Ltd and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information in the annual report and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information in the annual report and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the consolidated financial statements

The Board of Directors is responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRS and the provisions of Swiss law, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law, ISAs and Swiss Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Swiss law, ISAs and Swiss Auditing Standards, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists which has been designed for the preparation of consolidated financial statements according to the instructions of the Board of Directors.

We recommend that the consolidated financial statements submitted to you be approved.
